EMRE NEYSE

UX/UI DESIGNER | AI & VISUAL SPECIALIST

ABOUT

I am a designer who optimizes design processes with **AI** and combines **UX** and **UI** with an aesthetic graphic vision.

In the early years of my career, I gained experience in marketing design by working with global brands. Since 2017, I have fully shifted my focus to **UI/UX Design**, contributing to significant projects in Turkey, including **Garanti BBVA Emeli Sandığı, THY Weight&Balance, TürkTelekom Intellimap, Foramind, MWGuard Portal**, and **Kafein Technology Solutions Portal**.

I begin every project with the goal of maximizing user experience. To help brands stand out in the digital world, I build my designs on extensive **UX Research** and **User Testing**. This approach allows me to create solutions that are not only visually appealing but also genuinely meet user needs and have proven usability.
